ELITE DUO-MOTION

The latest technologies designed with your well-being in mind. Elite offers a latest-generation slatted bed base model that is ideal for relaxation, with a high-resistance polymer compound suspension and a system of Arnitel flex high-tech ball joints. The whole base adapts harmoniously to the sleeper's body. An extremely sturdy beech frame ensures perfect stability in all positions.

The radio frequency remote control lets you adjust your position for maximum well-being, precisely and effortlessly; thanks to the position memorisation feature, it's easy to return to the right posture for reading, watching television or relaxing in total comfort.

Fitted with the "Push & Stop" system, the two powerful, silent 6,000 N m motors are powered solely when in use; therefore there is no residual current under your bed.

Available in standard sizes, it fits all bed frames or can simply stand on feet.
